

TrailsIQ

TRAIL MANAGEMENT SOFTWARE

**A TRAIL IS
NEVER FINISHED.
WE HELP YOU RUN IT.**

Maintenance, builds, planning, inventory and live conditions for your whole trail network — in one app.

trailsiq.com

WHY TRAILS IQ

RUN YOUR WHOLE TRAIL NETWORK, NOT A DOZEN SPREADSHEETS.

Most trail organizations run everything on spreadsheets, group texts, a folder of GPX files and somebody's memory. A blowdown gets reported "somewhere past the second bridge," and by the time the chat has sorted out weekend plans, it's gone.

TrailsIQ was built on the trail, by a working crew, to pull the whole job into one place. What you have, what condition it's in, what needs doing, who did it — and what the public is told.

Maintenance

Builds

Planning

Inventory

Live conditions

THE DIGGING WAS NEVER THE HARD PART. KEEPING TRACK OF EVERYTHING BEHIND IT IS.

THE CORE APP

EVERYTHING IN ONE PLACE

TRAIL MANAGEMENT, SIMPLIFIED

**RUN YOUR
WHOLE TRAIL
NETWORK.**

01 Maintenance
02 Inventory
03 Planning

Corridor 2

Big tree down 16"
✓ Driveway bypass
Blowdown
Tree crossing trail needs chainsaw

Swamp section OPEN
To bike path - May need drains or reroute
Water / Mud - Medium - 3 months ago

overgrowth OPEN
Needs cleaning
Clear Corridor - Medium - 2 months ago

Clear Corridor
✓ Driveway bypass
Clear Corridor

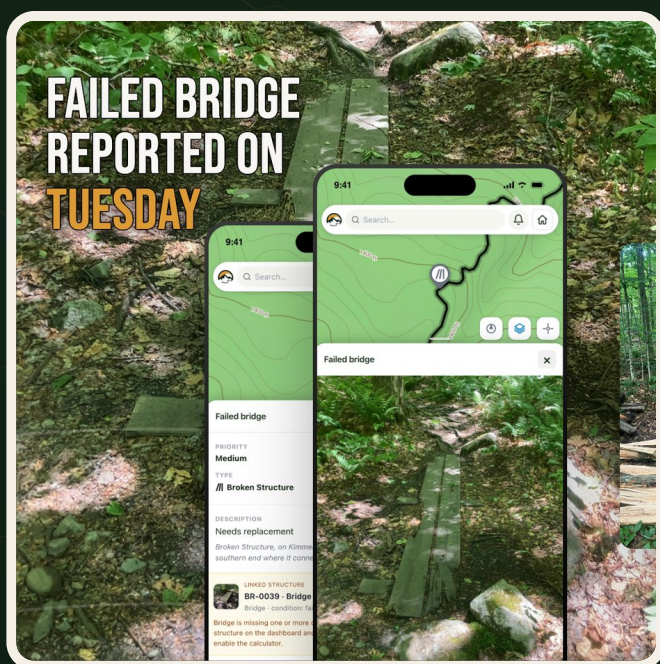

Track maintenance, Plan trails and publish live conditions — from one app.

Log maintenance from the field, track builds and structures, keep live conditions current, and manage your whole network on one map — phone in the field, web at the office.

PUBLIC REPORTING · FREE APP

TURN EVERY TRAIL USER INTO EXTRA EYES

A free app lets any hiker or rider report a problem straight from the trail — a photo, the exact GPS spot, a few taps. No login. It finds which trail they're on and routes it to the crew responsible. Every organization's trails, one shared system.

Reported Tuesday.

Fixed Friday.

THE WHOLE LOOP, CLOSED

A trail user flags it → the right crew gets it → it's tracked to done.

Nothing lost in a group chat, nothing forgotten past the second bridge.

Free public app · No login required · iOS & Android

ALSO FOR TRAIL BUILDERS

WALK IT. PRICE IT. WIN IT. BUILD IT.

Walk a new line once and TrailsIQ does the rest — the route, the takeoffs, a build estimate against your own rates, a proposal and a contract, before you're back at the truck. It even flags unsustainable grades and fall-line risk before you commit.

TRAIL PROPOSALS, SIMPLIFIED

THE APP FOR TRAIL BUILDERS

You walk the line once. By the time you're back at the truck, your paperwork is done!

01 WALK IT

02 PRICE IT

03 WIN IT

04 BUILD IT

OUR PROMISE

AFFORDABLE FOR EVERY TRAIL ORGANIZATION

Good trail software shouldn't be a luxury only well-funded organizations can afford. Non-profits shouldn't have to spend trail money on software instead of trails. Keeping TrailsIQ affordable for every organization — big or small — has been the goal from day one. The more crews that join, the lower we can hold the price for everyone.

1

Create a free account

No credit card, no commitment.

2

Add your trails

Import GPX/KML or draw them — minutes, not hours.

3

Take it to the field

Your whole crew, one app, on iOS and Android.

Start free at trailsiq.com

Or grab the free public report app on the App Store & Google Play.
